

Renal Pathology for the Nephrologist

January 22-23, 2011

Organized by

Department of Pathology, G B Pant Hospital
in collaboration with Delhi Nephrology Society

Venue: Auditorium, GB Pant Hospital, New Delhi

Invitation

Dear Sir / Madam,

The kidney biopsy is one of the primary determinants of diagnosis in renal disorders. Treatment of the patient in nephrology practice often hinges on an accurate pathological evaluation of the kidney biopsy. Therefore it is important for the nephrologist to understand renal pathology, so that he is able to interpret the pathologist's report with comfort and better plan his treatment.

Dr. Rennke, from Harvard Medical School and Dr Surya V Seshan from Weill Cornell Medical College are excellent renal pathologists with a vast sea of experience behind them. This conference aims at simplifying renal pathology with their help. The conference is targeted towards young and upcoming nephrologists and pathologists. We at G B Pant Hospital and associated Maulana Azad Medical College, New Delhi are sure that the conference will prove to be a rewarding experience for you.

CHIEF PATRONS

Dr. A K Aggarwal

Dean, Maulana Azad Medical College

Dr. Veena Chowdhury

Director, G B Pant Hospital

Dr. O P Kalra

President, Delhi Nephrology Society

Principal, UCMS Medical College, New Delhi

ORGANISING CHAIR PERSONS

Dr. Ranjana Gondal

Director Professor & Head,

Dept. of Pathology, GB Pant Hospital

Dr. N P Singh

Director Professor and Secretary, DNS

Dept. of Medicine, Maulana Azad Medical College

First Announcement

Tentative Topics

- Renal biopsy procedure
- Interpreting a Native Kidney Biopsy
- The Basic Lesions and Patterns of Injury
- Urine Examination for active sediments
- Urinary markers for renal disease
- Pathology and Pathogenesis of the Nephrotic Syndrome
- Collapsing glomerulonephritis
- Management of proteinuria
- The DPGN & MPGN Patterns of Injury
- Membranous Glomerulonephritis - Pathogenesis and Pathology
- Classification and Pathogenesis of Lupus Nephritis
- Thrombotic Angiopathies and Pregnancy-related Kidney Diseases
- Pathology of ANCA mediated GN and other forms of crescentic GN
- Pathology of the Allograft; the Banff classification
- Viral infections in Transplant Kidney
- Chronic rejection and Recurrent Diseases
- Amyloidosis & other Complications of Paraproteinemias
- IgA Nephropathy; Pathology and Pathogenesis
- Importance of electron microscopy in renal pathology
- Clinical Session (Interesting Cases)

ORGANISING COMMITTEE

Dr. Medha Tatke

Dr. Puja Sakhuja
